WORK EXPERIENCE

○ Oct 2022 - Present
IT Teams

Full-stack software engineer

Currently, I am actively collaborating with a renowned client specializing in energy solutions and services. Within this role, I am leveraging my expertise in Java, Spring Boot, React TypeScript, and GraphQL to spearhead the development of innovative features and functionalities, enhancing the client's offerings and market competitiveness.

○ Apr 2021- Oct 2022
Zenitech

Frontend software engineer

I served as a key contributor to the development of a platform focused on enhancing employee engagement and experience for companies worldwide. Through my expertise in React TypeScript and GraphQL, I played a vital role in shaping the platform's capabilities. My efforts were instrumental in propelling the company's evolution from an international player to a global leader, significantly broadening its influence and presence across diverse markets worldwide.

○ Jul 2018- Apr 2021
Micro Focus

Full-stack software engineer

As a full-stack software engineer, I made significant contributions to the advancement of a highly impactful Robotic Process Automation (RPA) platform. This platform serves as a cornerstone for numerous clients, enabling them to effortlessly design and execute workflows with software robots, thereby elevating operational efficiency and productivity across various sectors. Leveraging my expertise in Java, Spring, React, and TypeScript, I played a pivotal role in ensuring the platform's effectiveness and widespread adoption within diverse industries.
